New Orders

RCR is pleased to announce new orders to the value of approximately \$8.5 million in respect of mining equipment orders and site contract works at the Newcrest Telfer Project.

Workshops continue to operate at high levels of utilisation and the new workshops in Kalgoorlie and Tom Price have secured significant additional site work.

The Company has approved capital expenditure of approximately \$1 million to install the latest laser cutting equipment at its newly acquired Laser & Allied business division. The new laser will have a 5.4KW power source with a capability to cut 25mm thick steel, in excess of the current capacity of 16mm. RCR anticipates that this will generate significant revenues for the company, in a broadened segment of the rapidly expanding metal cutting market.

Yours faithfully
